ClassicStandard 4

Classic Exhaust Air Unit

compact

Regardless of whether you opt for a ClassicOpen, ClassicStandard or an extraction unit for attachment to a special booth, the manual booths in our ClassicLine are always just right for your needs. A space-saving design, integrated functions and ease of operation provide ideal conditions for efficient and high quality manual coating.

flexible

ClassicLine manual booths are the right solution for every application: for new start up and experienced users alike, or as a one-off solution for small or medium series. You have the choice between a compact standard design and an open version for particularly voluminous parts. You can also adjust the extraction capacity to your particular needs: 4000 Nm³/h are perfect for smaller coating tasks, while 6600 Nm³/h are ideal for larger items.

powerful

The powder coated steel booth cabin provides a well-lit, bright working environment. The extraction volume of the system is constantly monitored, with a warning light for filter cleaning as the minimum volume is reached. Colour change is possible with the interchangeable cartridge filters.

**Compliance and safety label:
ATEX compliance guarantees
highest level of safety**

Gema Switzerland

Your global partner for high quality powder coating

Take advantage of our expertise and experience from more than 50 years of electrostatic powder coating applications.
