## Installation Key Data

**Parts:** Modular Electrical Cabinets

**Part Size:** H 1'800 mm  
B 300 mm  
L 3'000 mm

**Conveyor Speed:** 4.0 m/min

### **Scope of delivery:**

- 1 x OptiFlex® Automatic AS06 / 16P
- 2 x OptiSelect® GM03-P
- 2 x Reciprocator ZA07-13 / XT11-10
- 1 x MagicControl CM30 system control
- 1 x OptiCenter® OC03
- 1 x OptiCenter® exhaust stand alone filter
- 16 x OptiSpray Application pump AP01

## LOGSTRUP – Retrofit for Modular Electrical Systems

### Company Profile - LOGSTRUP History

Over the last 40 years Logstrup has grown dramatically and today Logstrup has offices in 4 countries and partners in more than 60 countries.

The core of the Logstrup product is a versatile and comprehensive modular steel enclosure system and a fully rated bus bar system.

### Gema Key to Success

With this installation Gema carried out a retrofit on an old third party system from 2001. Thanks to the OptiCenter OC03 powder management with OptiSpray application pumps in combination with OptiFlex Automatic control cabinets the the coating quality and repeatability of the results could be drastically improved. This resulted in a minimization of the manual

touch ups by 95%. The line speed was increased from 3.0 to 4.0 m/min (= 25%). As a consequence the production capacity was extended, which is highly appreciated by Logstrup.
